

## Data Analysis & Report Edit-Checker

# DARE

A user-friendly solution tailored for VR agencies to simplify RSA 911 data checks, support compliance, and keep staff focused and efficient.

### KEY BENEFITS

**Avoid Corrective Action**  
Catch and resolve errors before they escalate.

**Case Management Agnostic**  
DARE integrates seamlessly with any case management system.

**Actionable Insights**  
Identify errors and highlight patterns through Actionable Insights.

**Skill Development**  
Pinpoint specific training gaps by identifying counselors who are struggling with compliance.

**Save Time**  
Agencies report up to 40%-time savings on compliance tasks.

**Accurate & Precise**  
Ensures every detail is meticulously reviewed with the latest regulations.

### OUT-OF-THE-BOX FEATURES

**Automated Compliance Check**

Automated checks on your data, flagging issues early and allowing you to address them long before submission deadlines.

**Full Export Options**

Easily export error reports and share them with your team for prompt resolution and targeted improvements.

**Intuitive interface**

Intuitive design makes for easy navigation, providing a seamless experience for users of all technical skill levels, ensuring quick adoption and effective use.

**Advanced File Handling**

Upload both your RSA 911 and caseload files to capture case-specific details, enabling precise error detection and identifying training needs.

**Compliance with the latest DCL**

Stay compliant with the latest federal RSA guidelines and avoid corrective action plans.

**Secure Hosting**

Benefit from the security and reliability of AWS GovCloud, ensuring your data is protected in a highly secure environment.

## Comprehensive Error Detection

Move beyond basic validation by identifying errors across all levels:
