

Focus on what really matters. Automate the rest.

inFormed + SaraWorks

The Libera inFormed CMS already streamlines case management for your staff, driving efficiency and accuracy **within the client record**.

With SaraWorks client communication software, your workstream becomes even more efficient.

How the integration lets counselors do more counseling

Handle all client communication in one secure platform.

SaraWorks is your single source for HIPAA A-compliant automated or manual emails, texts, video meetings, appointment booking and reminders, surveys, and document uploads.

Expedite communication & document collection

InFormed and SaraWorks automate communication and documentation, reducing manual effort and ensuring RSA-911 requirements are met without the hassle.

Stay in sync, engaged, and compliant.

Together, SaraWorks and InFormed drive engagement between staff in the field, your front office, and employer partners through mobile, flexible, and compliant communication.

Log out and recharge at the end of the day.

SaraWorks automates case notes and sends them to InFormed, so counselors can finish their day without the burden of after-hours documentation.

Customize workflows · Modernize affordably · Get started within 60 days

"I have an automatic system that does the post-year outreach, and I don't have to even think about it... it's beautiful."

Program Coordinator
